

Summit House,
East Windham, N.Y.
July 20 / 88

Mr. Fox.

Dear Sir,

Last week Mamma wrote to you to know if there was any objection to her having an extended leave of absence until the last of August.

She spoke to you about it before leaving the city, and desired it on account of the poisoned condition of her hands. This seems to have become a greater necessity as the eruption has now broken out on her face and hands, and

nick. She seems to experience such anxiety about receiving no answer that I thought it best to write again lest the former letter had been miscarried. Hoping that you are enjoying the best health

I am,

Yours respectfully,
Jessie H. Tomlinson.

Mr. Fox

Dear Sir,

Last week Mamma wrote to you to know if there was any objection to her having an extended leave of absence until the last of August.

She spoke to you about it before leaving the city, and desired it on account of the poisoned condition of her hands. This seems to have become a greater necessity as the eruption has now broken out on her face and hands, and neck. She seems to experience such anxiety about receiving no answer that I thought it best to write again lest the former letter had been miscarried. Hoping that you are enjoying the best health.

I am,
Yours respectfully,
Jessie H. Tomlinson
